Parking	2 garages
PENB	G
Reference number	102726

This spacious three-story house requiring complete reconstruction, suitable for housing and commercial purposes, with 2 garages and a large garden lined with mature greenery, stands in an attractive and excellently accessible location on a side cul-de-sac in a dynamically developing location in Prague 5 - Radlice.

The ground and first floors have recently been used as offices with a total of 9-10 rooms, sanitary facilities, and kitchens. On the 2nd floor, there is a 1-bedroom apartment. A nice garden adjoins the house, and from the windows there are impressive views of the surrounding and distant green areas and of a modern development that is currently being built on a former brownfield in the neighborhood.

The brick house approved as a family house is in a condition requiring complete reconstruction. Heating is provided by a Vaillant gas boiler, and parking is provided in two garages in the basement of the house.

A convenient location in the neighborhood of the Waltrovka and Nová Waltrovka districts ensures convenient access to a supermarket, other shops, and services (including medical ones) as well as a cultivated environment with a park, at the same time the new complex will prevent the nuisance of noise from Radlická Street. A metro station and a tram stop are a few minutes' walk away, and you can easily connect to the City and Prague Ring Roads by car. Nearby is a park, a kindergarten and elementary school, a swimming stadium, or a sports field with tennis courts.

Usable area 630.72 m², built-up area 174 m², garden 658 m², plot 832 m².
